SUBJECT INDEX

Antimony
graphite intercalated with $SbCl_5$ and SbF_5, chemical and microstructural organization of, from ^{121}Sb-Mössbauer spectroscopy, 109
Applied potential
influence of, on surface composition of electrochemically synthesized polyanilines, 169

Benzo[b]thiophene
electrochemical copolymerization of, 33
Bis(vinylenedithio)tetrathiafulvalene
synthesis and electrical conductivities of charge-transfer complexes of, and its methyl derivatives with strong acceptors, 177
Bromine
synthesis and stability of Br_2, ICl and IBr intercalated pitch-based graphite fibers, 185

Charge-transfer complexes
of bis(vinylenedithio)tetrathiafulvalene and it methyl derivatives with strong acceptors, synthesis and electrical conductivities of, 177
Chemical compensation
of conducting polypyrrole by NaOH solution, studies on, 139
Chlorine
synthesis and stability of Br_2, ICl and IBr intercalated pitch-based graphite fibers, 185
Conducting polymers
precursors for preparation of; synthesis and cyclic voltammetric behaviour of some 3-substituted thiophenes and pyrroles, 153
Conduction mechanism
of polyaniline; effect of moisture, 1
Conductivity
depolarization thermocurrents and frequency dependence of, in standard and rolled $(CH)_x$, 281
Copper nitrile complexing
influence of, on electronic structure of polyacrylonitrile, 21

Counter ion effect
enhancement of electrical conductivity of polypyrrole films by stretching, 209
Cyclic voltammetric behaviour
of some 3-substituted thiophenes and pyrroles, synthesis and; precursors for preparation of conducting polymers, 153

Depolarization
thermocurrents and frequency dependence of conductivity in standard and rolled $(CH)_x$, 281
o-, *m*-, *p*-Diazines
electrochemical behaviour of polypyridazine and, 9
Dopant molecules
effect of, on molecular order of electrically-conducting films of polypyrrole, 247
Dopant–polymer interaction
$MoCl_5$-doped polyacetylene, 225
Doping levels
electrical conductivity and thermoelectric power of polypyrrole with different, 99

Electrical conductivities
of charge-transfer complexes of bis(vinylenedithio)tetrathiafulvalene and its methyl derivatives with strong acceptors, synthesis and, 177
Electrical conductivity
of polypyrrole film, enhancement of, by stretching; counter ion effect, 209
and thermoelectric power of polypyrrole with different doping levels, 99
Electrically-conductive fibers
on polyaniline spun from solutions in concentrated sulfuric acid, 383
Electrochemical behaviour
of polypyridazine and *o*-, *m*-, *p*-diazines, 9
Electrochemical control
of morphology, adherence, appearance and growth of polypyrrole films, 79

© Elsevier Sequoia/Printed in The Netherlands

Electrochemical copolymerization
of benzo[b]thiophene, 33
Electrochemical degradation
of polyaniline, 349
Electrochemical synthesis
of GICs with Ni and hydroxides, 41
Electrochromic devices
polyaniline thin film, 203
Electron back-donation
in tetrahydrofuran K GICs, optical study of, 357
Electronic structure
of polyacrylonitrile, influence of Cu nitrile complexing on, 21
thiazole-based polymers; synthesis, characterization and, 259
E.s.r. study
partially deuterated tetramethoxydibenzofuranhexafluorophosphate, 61
Excitations
photoinduced localized charged, in polyaniline, 49

Feast monomer
kinetic control in polymerization of; route into finite polyenes, 311
Fluorides
graphite, prepared at room temperature; synthesis and characterization, 89
Frequency dependence
depolarization thermocurrents and, of conductivity in standard and rolled $(CH)_x$, 281

Graphite
chemical and microstructural organization of, intercalated with $SbCl_5$ and SbF_5 from ^{121}Sb-Mössbauer spectroscopy, 109
Graphite fibers
synthesis and stability of Br_2, ICl and IBr intercalated pitch-based graphite fibers, 185
Graphite fluorides
prepared at room temperature; synthesis and characterization, 89
Graphite intercalation compounds
with Ni and hydroxides, electrochemical synthesis of, 41
tetrahydrofuran K, optical study of electron back-donation in, 357
third stage HNO_3–, investigation of low-temperature structure of, 321

Hydroxides
electrochemical synthesis of GICs with Ni and, 41

Iodine
synthesis and stability of Br_2, ICl and IBr intercalated pitch-based graphite fibers, 185

Kinetic control
in polymerization of Feast monomer; route into finite polyenes, 311

Langmuir–Blodgett films
of poly(3-dodecylthiophene), conductive and optically non-linear polymeric, 369
Low-temperature structure
of third-stage HNO_3–GIC, investigation of, 321

Mercury anode
improvement in quality of polypyrrole films prepared electrochemically on, 69
Metal
plasma-polymerized, phthalocyanine films; preparation, propterties and morphology, 391
Microstructural organization
of graphite intercalated with $SbCl_5$ and SbF_5 from ^{121}Sb-Mössbauer spectroscopy, chemical and, 109
Moisture
conduction mechanism of polyaniline; effect of, 1
Molecular order
effect of dopant molecules on, of electrically-conducting films of polypyrrole, 247
Molybdenum
dopant–polymer interaction; $MoCl_5$-doped polyacetylene, 225
Mössbauer spectroscopy
^{121}Sb-. chemical and microstructural organization of graphite intercalated with $SbCl_5$ and SbF_5 from, 109

Nickel
electrically-conductive nickelphthalocyanine polymer, 237
electrochemical synthesis of GICs with, and hydroxides, 41

Nitric acid
–GIC, investigation of low-temperature structure of third-stage, 321
N.m.r.
^{13}C, structural analysis of deprotonated polyaniline by solid-state, 195

Optical study
of electron back-donation in tetrahydrofuran K GICs, 357
Organosynthetic routes
to polythiophene and its derivatives, novel, 267

Photoelectrochemical behaviour
of electrogenerated poly(2,3-diaminophenazine) on Pt in aqueous media, 339
Photoinduced localized charged excitations
in polyaniline, 49
Phthalocyanine
electrically-conductive nickelphthalocyanine polymer, 237
Phthalocyanine films
plasma-polymerized metal; preparation, properties and morphology, 391
Platinum
photoelectrochemical behaviour of electrogenerated poly(2,3-diaminophenazine) on, in aqueous media, 339
Polarons
travelling solitons and, as non-reflecting potentials in polyacetylene, 327
Polyacetylene
depolarization thermocurrents and frequency dependence of conductivity in standard and rolled $(CH)_x$, 281
$MoCl_5$-doped; dopant–polymer interaction, 225
travelling solitons and polarons as non-reflecting potentials in, 327
Polyacrylonitrile
electronic structure of, influence of Cu nitrile complexing on, 21
Poly(3-alkylthiophenes)
thermal undoping in, 297
Polyaniline(s)
conduction mechanism of; effect of moisture, 1
electrically-conductive fibers on, spun from solutions in concentrated sulfuric acid, 383
electrochemical degradation of, 349
photoinduced localized charged excitations in, 49
structural analysis of deprotonated, by solid-state ^{13}C n.m.r., 195
surface composition of electrochemically synthesized, influence of applied potential on, 169
thin film electrochromic devices, 203
Poly(2,3-diaminophenazine)
photoelectrochemical behaviour of electrogenerated, on Pt in aqueous media, 339
Poly(3-dodecylthiophene)
conductive and optically non-linear polymeric Langmuir–Blodgett films of, 369
Polyenes
route into finite; kinetic control in polymerization of Feast monomer, 311
Polymerization
of Feast monomer, kinetic control in; route into finite polyenes, 311
Polypyridazine
electrochemical behaviour of, and *o*-,*m*-,*p*-diazines, 9
Polypyrrole
chemical compensation of conducting, by NaOH solution, studies on, 139
electrical conductivity and thermoelectric power of, with different doping levels, 99
electrically-conducting films of, effect of dopant molecules on molecular order, 247
Polypyrrole film(s)
electrochemical control of morphology, adherence, appearance and growth of, 79
enhancement of electrical conductivity of, by stretching; counter ion effect, 209
improvement in quality of, prepared electrochemically on Hg anode, 69
Polythiophene
novel organosynthetic routes to, and its derivatives, 267
Potassium
tetrahydrofuran K GICs, optical study of electron back-donation in, 357
Pyrroles
synthesis and cyclic voltammetric behaviour of some 3-substituted

thiophenes and; precursors for preparation of conducting polymers, 153

Solitons
travelling, and polarons as non-reflecting potentials in polyacetylene, 327
Stability
of Br_2, ICl and IBr intercalated pitch-based graphite fibers, synthesis and, 185
Stretching
enhancement of electrical conductivity of polypyrrole films by; counter ion effect, 209
Structural analysis
of deprotonated polyaniline by solid-state ^{13}C n.m.r., 195
Surface composition
of electrochemically synthesized polyanilines, influence of applied potential on, 169
Synthesis
and cyclic voltammetric behaviour of some 3-substituted thiophenes and pyrroles; precursors for preparation of conducting polymers, 153
and electrical conductivities of charge-transfer complexes of bis(vinylenedithio)tetrathiafulvalene and its methyl derivatives with strong acceptors, 177
of GICs with Ni and hydroxides, electrochemical, 41
graphite fluorides prepared at room temperature; and characterization, 89
and stability of Br_2, ICl and IBr intercalated pitch-based graphite fibers, 185
thiazole-based polymers; characterization and electronic structure, 259

Tetrahydrofuran
K GICs, optical study of electron back-donation in, 357
Tetramethoxydibenzofuranhexafluorophosphate
partially deuterated; e.s.r. study, 61
Thermal undoping
in poly(3-alkylthiophenes), 297
Thermoelectric power
of polypyrrole with different doping levels, electrical conductivity and, 99
Thiazole-based polymers
synthesis, characterization and electronic structure, 259
Thiophenes
synthesis and cyclic voltammetric behaviour of some 3-substituted, and pyrroles; precursors for preparation of conducting polymers, 153
